Re: Joint Petition of Green Mountain Power
Docket No. 7628

Dear Sue:

I wish to make two corrections to my letter dated April 4, 2011 filed in the above proceeding. First, with apologies to my witness, I intended that Jean Vissering be described as Ms. Vissering, not Mr. Vissering. Second, the last sentence at the end of the second paragraph was intended to indicate that the GMC did not recommend in its testimony or its original post hearing filing that all of the Wind Turbine Guidelines Advisory Committee recommendations should be implemented because the GMC thought GMP would accept the installation of the OCAS system as a condition of its permit. Of course there is some risk, but that risk is where it should be – on the applicant. There is no reason why the OCAS system cannot be approved by the FAA if GMP diligently pursues it. Just as any mitigation requirement will be imposed as a condition to its permit we respectfully ask that the implementation of the OCAS system be imposed as a legally enforceable condition. The size and impact of this project is too great to rely on a “best efforts” approach.

As we argued in our earlier filing there are aesthetic reasons why the number of turbines should be reduced apart from the implementation of the OCAS system.

Very truly yours,

Gerald R. Tarrant
